The Financial Mathematics exam is called Exam FM by the SOA and Exam 2 by the CAS. This three-hour exam consists of 35 multiple-choice questions. The examination is administered by Preliminary Actuarial Examinations/SOA. The examination is jointly sponsored and administered by the CAS, SOA, and the Canadian Institute of Actuaries (CIA). The examination is also jointly sponsored by the American Academy of Actuaries (AAA) and the Conference of Consulting Actuaries (CCA).

The Financial Mathematics Exam is administered as a computer-based test. For additional details, please refer to Exam Rules

The goal of the syllabus for this examination is to provide an understanding of the fundamental concepts of financial mathematics, and how those concepts are applied in calculating present and accumulated values for various streams of cash flows as a basis for future use in: reserving, valuation, pricing, asset/liability management, investment income, capital budgeting, and valuing contingent cash flows. The candidate will also be given an introduction to financial instruments, including derivatives, and the concept of no-arbitrage as it relates to financial mathematics.

The Financial Mathematics Exam assumes a basic knowledge of calculus and an introductory knowledge of probability.

The following learning objectives are presented with the understanding that candidates are allowed to use specified calculators on the exam. The education and examination of candidates reflects that fact. In particular, such calculators eliminate the need for candidates to learn and be examined on certain mathematical methods of approximation.

Please check the Updates section on this exam’s home page for any changes to the exam or syllabus.

The ranges of weights shown are intended to apply to the large majority of exams administered. On occasion, the weights of topics on an individual exam may fall outside the published range. Candidates should also recognize that some questions may cover multiple learning objectives.

Each multiple-choice problem includes five answer choices identified by the letters A, B, C, D, and E, only one of which is correct. Candidates must indicate responses to each question on the computer. Candidates will be given three hours to complete the exam.

As part of the computer-based testing process, a few pilot questions will be randomly placed in the exam (paper and pencil and computer-based forms). These pilot questions are included to judge their effectiveness for future exams, but they will NOT be used in the scoring of this exam. All other questions will be considered in the scoring. All unanswered questions are scored incorrect. Therefore, candidates should answer every question on the exam. There is no set requirement for the distribution of correct answers for the SOA/CAS/CIA multiple-choice preliminary examinations. It is possible that a particular answer choice could appear many times on an examination or not at all. Candidates are advised to answer each question to the best of their ability, independently from how they have answered other questions on the examination.

Since the CBT exam will be offered over a period of a few days, each candidate will receive a test form composed of questions selected from a pool of questions. Statistical scaling methods are used to ensure within reasonable and practical limits that, during the same testing period of a few days, all forms of the
test are comparable in content and passing criteria. The methodology that has been adopted is used by many credentialing programs that give multiple forms of an exam.

LEARNING OBJECTIVES

I. Interest Theory (65-80%)

A. Time Value of Money (5-15%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Interest rate (rate of interest)
   b. Simple interest
   c. Compound interest
   d. Accumulation function
   e. Future value
   f. Present value/net present value
   g. Discount factor
   h. Discount rate (rate of discount)
   i. Convertible m-thly
   j. Nominal rate
   k. Effective rate
   l. Inflation and real rate of interest
   m. Force of interest
   n. Equation of value

2. The candidate will be able to:
   a. Given any two of interest rate, present value, or future value, calculate the third based on simple or compound interest.
   b. Given any one of the effective interest rate, the nominal interest rate convertible m-thly, the effective discount rate, the nominal discount rate convertible m-thly, or the force of interest, calculate all of the other items.
   c. Write the equation of value given a set of cash flows and an interest rate.

B. Annuities with payments that are not contingent (5-20%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Annuity-immediate
   b. Annuity-due
   c. Perpetuity
   d. Payable m-thly, or Payable continuously
   e. Level payment annuity
   f. Arithmetic increasing/decreasing payment annuity
   g. Geometric increasing/decreasing payment annuity
   h. Term of annuity

2. The candidate will be able to:
   a. Given an annuity with level payments, immediate (or due), payable m-thly, (or payable continuously), and any three of present value, future value, interest rate, payment, and term calculate the remaining two items.
   b. Given an annuity with non-level payments, immediate (or due), payable m-thly, (or payable continuously), the pattern of payment amounts, and any three of present value, future value, interest rate, payment amounts, and term of annuity calculate the remaining two items.
C. Loans (5-20%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Principal
   b. Interest
   c. Term of loan
   d. Outstanding balance
   e. Final payment (drop payment, balloon payment)
   f. Amortization
   g. Sinking fund

2. The candidate will be able to:
   a. Given any four of term of loan, interest rate, payment amount, payment period, principal, calculate the remaining items.
   b. Calculate the outstanding balance at any point in time.
   c. Calculate the amount of interest and principal repayment in a given payment.
   d. Given the quantities, except one, in a sinking fund arrangement calculate the missing quantity.

D. Bonds (5-20%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Price
   b. Redemption value
   c. Par Value/Face value
   d. Coupon, Coupon rate
   e. Term of bond
   f. Yield rate
   g. Callable/non-callable
   h. Book value
   i. Accumulation of discount/Amortization of premium

2. The candidate will be able to:
   a. Given any four of price, redemption value, yield rate, coupon rate, and term of bond, calculate the remaining item.

E. General Cash Flows and Portfolios (5-20%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Yield rate/rate of return
   b. Dollar-weighted rate of return/Time-weighted rate of return
   c. Current value
   d. Duration (Macaulay, modified and effective)
   e. Convexity
   f. Portfolio and investment year allocation methods
   g. Spot rate
   h. Forward rate
   i. Yield curve
   j. Stock price, stock dividend

2. The candidate will be able to:
   a. Calculate the current value of a set of cash flows.
   b. Calculate the portfolio yield rate.
c. Calculate the dollar-weighted and time-weighted rate of return.
d. Calculate the duration and convexity of a set of cash flows.
e. Calculate either Macaulay or modified duration given the other.
f. Use duration and convexity to approximate the change in present value due to a change in interest rate.
g. Calculate the price of a stock using the dividend discount model.

F. Immunization (5-15%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Cash-flow matching;
   b. Immunization (including full immunization);
   c. Redington immunization.

2. The candidate will be able to:
   a. Construct an investment portfolio to fully immunize a set of liability cash flows.
   b. Construct an investment portfolio to match present value and duration of a set of liability cash flows.
   c. Construct an investment portfolio to exactly match a set of liability cash flows.

II. Financial Economics (20-35%)

A. General Derivatives (0-5%)

   1. The candidate will be able to define and recognize the definitions of the following terms:
      a. Derivative, Underlying asset, Over-the-counter market
      b. Ask price, Bid price, Bid-ask spread
      c. Short selling, Short position, Long position
      d. Stock index
      e. Spot price
      f. Net profit/payoff
      g. Credit risk
      h. Marking-to-market
      i. Margin, Maintenance margin, Margin call

   2. The candidate will be able to evaluate an investor’s margin position based on changes in asset values.

B. Options (5-10%)

   1. The candidate will be able to define and recognize the definitions of the following terms:
      a. Call option, Put option
      b. Expiration, Expiration date
      c. Strike price/Exercise price
      d. European option, American option, Bermudan option
      e. In-the-money, At-the-money, Out-of-the-money
      f. Covered call, Naked writing
      g. Dividends
      h. Put-call parity

   2. The candidate will be able to evaluate the payoff and profit of basic derivative contracts.

C. Hedging and Investment Strategies (5-15%)
1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Hedging, Arbitrage
   b. Diversifiable risk, Nondiversifiable risk
   c. Synthetic forwards
   d. Spreads (including bull, bear, box, and ratio spreads)
   e. Collars (including zero-cost collars), Paylater strategy
   f. Convertible bond, Mandatorily convertible bond

2. The candidate will be able to:
   a. Explain how derivative securities can be used as tools to manage financial risk.
   b. Explain the reasons to hedge and not to hedge.
   c. Evaluate the payoff and profit of hedging strategies.

D. Forwards and Futures (0-10%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Forward contract, Prepaid forward contract
   b. Outright purchase, Fully leveraged purchase
   c. Implied repo rate
   d. Cost of carry
   e. Lease rate
   f. Futures contract

2. The candidate will be able to:
   a. Determine forward price from prepaid forward price.
   b. Explain the relationship between forward price and futures price.
   c. Explain the relationship between forward price and future stock price.
   d. Use the concept of no-arbitrage to determine the theoretical value of futures and forwards.
   e. Given any four of call premium, put premium, forward price, strike price and interest rate, calculate the remaining item using the put-call parity formula.

E. Swaps (0-5%)

1. The candidate will be able to define and recognize the definitions of the following terms:
   a. Swap, Prepaid swap
   b. Swap term, Swap spread, Notional Amount
   c. Simple commodity swap, Interest rate swap
   d. Deferred swap

2. The candidate will be able to use the concept of no-arbitrage to determine the theoretical values of swaps.

Text References

Knowledge and understanding of the financial mathematics concepts are significantly enhanced through working out problems based on those concepts. Thus, in preparing for the Financial Mathematics exam, whichever of the source textbooks candidates choose to use, candidates are encouraged to work out the textbook exercises related to the listed readings.
Suggested Textbooks for Learning Objectives in Section I, Interest Theory

There is not a single textbook required for the learning objectives in Section I. The texts listed below are representative of the textbooks available to cover the material on which the candidate may be tested. Not all topics may be covered at the same level in each text. The candidate may wish to use one or more texts in his/her preparation for the examination.

[Candidates may also use Fifth Edition, same chapters]
Chapter 1 (1.1-1.7)
Chapter 2 (2.1 -2.4 excluding 2.4.2 and 2.4.3)
Chapter 3 (3.1-3.3, excluding 3.2.1 and 3.2.2)
Chapter 4 (4.1-4.3.1)
Chapter 5 (5.1-5.3 excluding 5.1.4 and 5.3.2)
Chapter 6 (6.1-6.3 excluding 6.2)
Chapter 7 (7.1-7.2)
Chapter 8 (8.1, 8.3.1 and 8.4.1–8.4.2)

Chapter 1 (1.3-1.12, 1.14)
Chapter 2 (2.2-2.7)
Chapter 3 (3.2-3.9, 3.11, 3.13)
Chapter 4 (4.2-4.6)
Chapter 5 (5.2-5.4)
Chapter 6 (6.2-6.6, 6.9)
Chapter 7 (7.1)
Chapter 8 (8.3)
Chapter 9 (9.1-9.5)

Chapter 1 (1.2-1.10)
Chapter 2 (2.3-2.6)
Chapter 3 (3.2-3.8)
Chapter 4 (4.2-4.9)
Chapter 5 (5.2-5.6)
Chapter 6 (6.2-6.7, 6.10)
Chapter 7 (7.2-7.7)
Chapter 9 (9.4)
Chapter 10 (10.2-10.5)
Chapter 11 (11.2-11.8)

Chapter 1
Chapter 2
Chapter 3 (3.1-3.9)
Chapter 4 (4.1-4.7)
Chapter 5
Chapter 6 (6.1-6.3 excluding 6.1.6-6.1.7)
Chapter 7 (7.1-7.9)
Chapter 8 (8.1-8.3)

Textbook for Learning Objectives in Section II, Financial Economics

Chapter 1 (1.1-1.4)
Chapter 2 (2.1-2.6 and Appendix 2.A)
Chapter 3 (3.1-3.5)
Chapter 4 (4.1-4.4)
Chapter 5 (5.1-5.4 and Appendix 5.B)
Chapter 8 (8.1-8.2).
